FOR IMMEDIATE RELEASE

**QUADLOGIC CONTROLS AWARDED ISO 9001:2008 CERTIFICATION**

LONG ISLAND CITY, NY, December 28, 2009 – Quadlogic Controls Corporation ([www.quadlogic.com](http://www.quadlogic.com)), an innovative provider of digital electric Smart Metering systems, announced today that it has earned certification of registration to ISO9001:2008 Standard for quality management system. BSI Management Systems America, an ANAB accredited registrar, issued the certification.

According to Doron Shafir, Quadlogic's President, "Implementing the requirements specified by the ISO9001:2008 Standard assures all of our clients the highest product quality assurance and best customer service practices. It is through outstanding teamwork that we have achieved the success of ISO 9001:2008 certification."

Quadlogic Controls Corporation manufactures digital electric Smart Metering systems that are remotely-readable using the company's patented Power Line Communication "PLC" frequency-hopping protocol. Since the utility is already connected to all customers, this method utilizes the existing electric power network for bi-directional data collection and load control, thus eliminating the need for RF drive-by, cellular, or hard-wired communication methods.

Quadlogic Controls (OTC: QDLC), founded in 1982, is the leading provider of digital electric Smart Metering & Submetering systems in the New York metropolitan region. QLC AMI systems are in use in high-rise office, residential, commercial, and industrial facilities all across the U.S. and Canada.

Utilities in several countries are presently installing EnergyGuard™ AMI systems including remote connect/disconnect capability. Quadlogic continues to develop and provide the most robust and innovative Smart Grid Power Line Communications AMI systems.
