FOR IMMEDIATE RELEASE

Phil Fram Joins Quadlogic Controls Corporation

LONG ISLAND CITY, NY, April 01, 2010 – Quadlogic Controls Corporation (www.quadlogic.com), an innovative provider of digital electric Smart Metering systems, is pleased to announce that Phil Fram has joined the company as Vice-President of Sales and Marketing.

Phil Fram brings 30 years of experience in electrical product sales and marketing management to Quadlogic. For the last 15 years, Phil was employed by Marince as VP Sales and Marketing, Industrial Group, and later, VP Marketing for the Marince Electrical Group, where he achieved dramatic business growth and successful new product roll-outs. Phil also has significant experience selling OEM products direct, and marketing through distribution.

At Quadlogic, Phil Fram is responsible for North American sales and marketing, introducing new Smart Meter products for the submetering market, and for relations with regulatory authorities.

Quadlogic Controls Corporation manufactures remotely-readable digital electric Smart Metering systems using the company's patented Power Line Communication "PLC" frequency-hopping protocol. Since the utility is already connected to all customers, this method utilizes the existing electric power network for bi-directional data collection and customer load control, thus eliminating the need for RF drive-by, cellular, or hard-wired communication methods.

Quadlogic Controls, founded in 1982, is the leading provider of digital electric Submetering systems in the New York metropolitan region. QLC AMI systems are in use in high-rise commercial, residential, and industrial facilities throughout North America. The first building awarded the USGBC Platinum designation, the FBI building in Chicago, relies on a Quadlogic submetering system.
